EDUCATION

College of Staten Island, City University of New York

Expected 2028

Bachelor of Science in Computer Science | Staten Island, NY

Relevant coursework: Data Structures, Database Systems, Computer Networking, Web Development, Programming Languages, Discrete Mathematics

RELEVANT EXPERIENCE

Peer mentor

09/2026 - Present

Computer science department

- Support faculty and staff with administrative tasks, document organization, and day-to-day department operations.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL, HTML, CSS **Web and APIs:** REST APIs, Bootstrap, GitHub Pages, Postman

Databases: MySQL, relational schemas, joins, aggregation, subqueries **Tools:** Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

CodePath Applications of AI Engineering - Honors

Summer 2026

- Completed an honors level program focused on the practical applications of artificial intelligence in software development.
- Participated in hands on labs and collaborative coding exercises.
- Reviewed team members code, identified errors, and helped debug and correct technical issues.
- Gained experience testing AI powered applications and improving their reliability.

Credential ID 422629

DATA.COM: Partnering with A.I in the workplace.

- Partnered with A.I tools like ChatGPT to make research, write and design in project environments.
- Created client ready reports and presentations by promoting ai for ideas and examples.

New York Jobs CEO Council: Software engineering

- Resolved a critical bug in an automated billing system by skillfully identifying the root cause and developing an affective solution.
- Improved experience for users by developing a code that supports a note taking feature on each invoice, enhancing communication and transparency between senders and recipients.

PROJECTS

Valorant REST API Web Application

[Live application](#) | [Source code](#)

05/2026

- Built and deployed a responsive web application that retrieves and presents Valorant agent, map, and game data from multiple API endpoints.
- Validated requests in Postman before integrating them with JavaScript, then organized the results into a clear Bootstrap-based interface.

CodePath Applications of AI Engineering Projects

08/2026

Provenance Guard, Mixtape, Cinelog, and PathReview | Summer 2026

- Implemented and debugged backend logic for metadata scoring, playlist services, streak tracking, notifications, and watchlist behavior across four applied engineering projects.
- Used automated tests and async SQLAlchemy mocks to isolate defects; completed Cinelog with 10/10 tests passing and improved PathReview to 18/19 tests passing.

Valorant Agent Guide

09/2026

- Designed and developed a responsive Valorant Agent Guide using HTML, CSS, and JavaScript.
- Created an interactive system that allows users to filter agents by their roles.
- Provided personalized agent recommendations for different Valorant maps.
